**Subject:** IEEE TVT - Decision on VT-2021-03587.R1- Accepted as a Paper

Dear Mr. Mao:

I am pleased to inform you that your paper:

VT-2021-03587.R1: Reconfigurable Intelligent Surface-assisted Secure Mobile Edge Computing Networks

has been accepted for publication in the IEEE Transactions on Vehicular Technology.

Attached below are comments from the reviewers which should be considered when returning your manuscript in its final form. In the final manuscript, please add the following first footnote (This would be in a paragraph before the author affiliations): "Copyright (c) 2015 IEEE. Personal use of this material is permitted. However, permission to use this material for any other purposes must be obtained from the IEEE by sending a request to [pubs-permissions@ieee.org](mailto:pubs-permissions@ieee.org). "

Please post the final version of the manuscript on your personal and/or your institutional websites for quick dissemination of the research results.

Please note that, if a paper is accepted, there is a mandatory page charge of US\$220.00 for each Transactions page exceeding eight printed pages (if your paper was initially submitted on 2019 or earlier) or ten printed pages (if your paper was initially submitted on 2020 or later). This charge is based on the final typeset length and not on manuscript length, and is a prerequisite for publication. Detailed instruction will accompany the page proofs. This charge is to offset the increasing cost of publishing the Transactions. The mandatory page charge applies in conjunction with the voluntary page charge policy. By submitting the final files for this manuscript you are acknowledging understanding of and agreeing to payment of any applicable overlength charges associated with this manuscript.

===

Please note that, effective June 2021, this journal provides one additional free page (or \$220 discount in the overlength page charge) to a paper whose corresponding author is a VTS member. It is a great time to join VTS if you are not a member yet. In addition to the additional free page, you can broaden your knowledge with complementary tools and resources as a VTS member:

- Digital delivery of IEEE Magazine
- Unlimited access to select VTS publications through the Vehicular Technology Digital Library via IEEE Xplore®
- Unlimited access to educational materials, including conference plenaries and tutorials, in the VTS Resource Center
- Vehicular Technology Newsletter

Please visit <https://vtsociety.org/engage/membership/> for more information.

===

The final version of your manuscript must comply with IEEE Periodicals requirements for text and graphics processing. Please submit all final files through the “awaiting final files” queue in your author center on Manuscript Central within 4 weeks. Your manuscript will be withdrawn from the system after one month. Please make sure that your final package is complete upon submission. Once you have completed the submission of your final files you will NOT be able to go back and make changes.

**\*\*Please do not send ANY items via email, regular mail, or fax, as they will not be processed if you do.\*\***

In addition to uploading your files, please check that the author-supplied data, such as contact and co-author information in step 3 of the final submission process, is correct and complete. Failure to enter complete author and co-author information in the designated area on Manuscript Central may result in publishing delays.

Your paper will appear in IEEE Xplore as a manuscript in the "Forthcoming" category before it actually appears in a printed issue. For your paper publication, please make sure your final manuscript (including main body, figures, tables, references, and biosketch) is in double-columned with fonts no smaller than 10pt in the final IEEE typesetting with maximum page length 16 pages for regular papers. Please prepare the following electronic files for the final submission:

- 1) A cover sheet with the phone, fax and email of the corresponding author.
- 2) The complete manuscript in two-column format in a Word, Tex or LaTeX file. Failure to submit a source file may result in publishing delays.
- 3) A PDF version of the complete manuscript in two-column format. As mentioned above, a pdf is NOT sufficient for publication. Please make sure to submit the source file detailed in step 2.
- 4) If your figures are not embedded in the source file of your manuscript, you will also need to upload separate figure files. The acceptable formats are Word, eps, ps, tiff, ppt and excel. We do NOT accept png or jpeg files for figures (figures should be named according to the figure numbers in the manuscript).
- 5) Biosketches and photos of all authors, if not included in the source file. Biosketches should be uploaded at the same time as the other final files, if you plan to include them. These can be included at the end of your Microsoft Word or Latex source file, or submitted as a separate upload. For author photos, jpeg or eps files are accepted. (naming style: authorfirstname\_lastname.jpg or authorfirstname\_lastname.eps)

**\*Please make sure that all files have unique file names in order for them to export successfully to IEEE.\***

IEEE has moved to an all electronic copyright submission system. Once you have submitted your final files, a link titled “transfer copyright” will appear in the “manuscripts with decisions” queue in your author center.

Failure to adhere to these guidelines will result in delays in processing the manuscript. For further submission information kindly consult the publication "Information for IEEE Transactions, Journals, and Letters Authors" located on the World Wide Web at

<http://www.ieee.org/web/publications/authors/transjnl/index.html>

or you may send inquiries via e-mail to [trans@ieee.org](mailto:trans@ieee.org).

Sincerely yours,

Yuanxiong Guo  
Editor, IEEE Transactions on Vehicular Technology
